Kavinschool is a technical institute which offers Selenium automation training using Ruby and Java languages. The training is project oriented and is totally designed for both novices who are new to Selenium and want to get up-to the speed quickly learning Selenium automation as well as advanced users to learn Selenium using different frameworks easily and get confident to attend the interviews. It offers both online and on-site training at a lower cost. Attending the training will allow you to eliminate or reduce the number of hours spend to figure out the ways to automate a website using Selenium. If you are a person who wants to read on your own with your own schedule try out our Self-Study on-line Selenium courses.

- Use your own laptop, learn from installation to implementation
- All required training materials are provided and access to extensive online knowledge base
- Take Online Quiz/ Assignments after every week course to test and improve your knowledge
- Questions? - Ask online using our Forum support
- Case Study: Orange HRM , Sugar CRM, ZenPhoto Open Source Projects
- Job Oriented Training focuses on complete Website automation
- Highly experienced Teaching faculty who has initially created and promoted Selenium automation to students in Bay Area and around the world.
